

**PERMANON·USA**<sup>TM</sup>  
*Innovative Surface Protection*

# Application Instructions

**For Ready-To-Use Permanon**

## APPLICATION INSTRUCTIONS:

These instructions are valid for any ready to use formulation of Permanon Supershine or Brilliant.

**1.** Clean the surface to be protected, we highly recommend cleaning the surface with Extreme Simple Green Aircraft Cleaner.

- Extreme Simple Green is a superb Ph balanced product that is economical. It is sold as a concentrate, and conforms to Boeing Aircraft requirements for application to all exterior surfaces.

- Other Ph balanced cleaners may be used provided they DO NOT have silicone, wax, oil or petroleum/other additives that leave any residues.

**2.** Lightly spray the Permanon Ready-To-Use onto the surface to be treated (it is safe and effective on glass, metal, plastic, rubber, paint, varnish, polished stone, cultured stone and any other solid surface).

**3.** Use a micro-fiber cloth to dry treated surfaces.

**4.** Step back and admire the results, you are done. No buffing, polishing, or other forms of “elbow grease”!
