

Captain Greg Butler-Davis M.Y Gemini Dreamer ,

"I run an older motor yacht, built entirely from timber, and **refinished with Awlgrip polyurethane paints**. We have a busy program in the summer months of cruising and charter, and invariably spend the months of the off season in refit and repair. We always seem to be busy, and as such **I am always looking for new labor saving products, which cut down the hours required to keep the yacht in presentable condition. Permanon products were first recommended to me by the owner of a painting company** employed to repaint the superstructure of the yacht. **After painting we applied the Permanon products to the recently painted surfaces.**

**The application process was simple, and it is clear that the results are effective. The paint retains a high gloss for longer periods between washing, and appears to be more resistant to marks and stains."**
