

Betreff: Permanon products for FORMGLAS SPEZIAL

Dear Sirs,

We are pleased to confirm that we have successfully tested Permanon products on FORMGLAS SPEZIAL.

This product is easy to handle and does not contain silicone nor any dangerous products. In addition it is **environmental friendly.**

This makes shipping and handling easy for us and for the crews on board.

At present we are testing with long-run tests. **In future we will coat our FORMGLAS SPEZIAL glazing prior to delivery and installation on board.** This will be an additional service for our clients.

At present our bonding supplier is carrying out long-run tests, if this coating has any influence on the bonding. We will inform you about the outcome later.
